1. Previously indicated allowability of claims 1 and 3-5, the office Action mailed out on July 27, 2005 is withdrawn in view of the new rejection under 35 U.S.C. 101.

Claim Rejections - 35 USC § 101

2 Claims 1 and 3-5 are rejected under 35 U.S.C. 101 because the claimed invention of is directed to non-statutory subject matter. Claim 1 is drawn to non-functional descriptive material. Claim 1 recites the limitation "squares of different sizes sharing the same geometric center point, wherein the pixel to be evaluated is at the center point of the structuring element A, wherein an inner square of the structure element A has a side dimension N, and an outer square has a side dimension M, wherein N represents a largest speckle that can be removed and M represents a dimension the speckle lies from other objects ", which is that the claim is directed to non-functional descriptive material since no requisite functionality is present to satisfy the practical application requirement, and the claim only recited the shape of the structuring element, then such non-functional descriptive material alone does not impart functionality either to the data as so structured. (See MPEP 2106).

Allowable Subject Matter

3 Based on applicant's amendment/persuasive arguments filed on December 22, 2004, the rejection for claims 6-35 has been withdrawn. Therefore, claims 6-35 are allowable.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
